

I would like to offer my support for pulver.com's petition.

I feel strongly that the FWD service being proposed will encourage competition amongst internet access providers.

I also feel this service is well suited to providing an open environment for FWD/SIP hardware manufactures to compete for consumers dollars.

I this being similar to the removal of the requirement that phone company customers could only use phone equipment provided by the telcos.

The FWD petition help ensure customers have access to the equipment of their choice regardless of who their internet access provider is etc.

I strongly urge you to agree with pulver.com's petition and look forward to using the new technology in an open market.

Sincerely,
Don Russell
